

7200

This model is ideal for larger jobs and can accommodate not only the large piece but also allows for two or three jobs to be going on at the same time. The 7200 model comes with tube filtration which cleans with a 99% capture rate at 1 micron, creating a much superior filtration system than any pleated filters. This model is suitable for all wood dust applications. This model also comes standard with filter cleaning brush/handle, casters, magnetic starter and a rubber coated top.
