

# 9600

This model is ideal for larger jobs, as well as accommodating to two or three jobs going at the same time on the table. The 9600 is ideal for wood dust. This model comes equipped with tube filtration which cleans with a 99% capture rate at 1 micron, creating a much superior filtration system than any pleated filters. The 9600 comes standard with a filter cleaning brush/handle for manually cleaning the filters, casters and a rubber coated top.
